

# **Retinecy Monetary Network (RMN)**

## **Staking & Yield Policy v1.1**

This updated version corrects payout-method clarification for long-term tiers and clarifies Founder mining rules. All staking is denominated in USDT.

# 1. Staking Currency

All staking is conducted in **USDT** with rewards derived strictly from SRF yield. No RTNC inflation or minting is used for reward generation.

## 2. Minimum Stake Requirements

**6–24 months:** \$50 minimum

**36–60 months:** \$100 minimum

**72 months:** \$500 minimum

These amounts ensure meaningful participation and protect SRF operational capacity.

### 3. Staking Terms & Revenue Share

Members receive a percentage of SRF staking yield based on lock duration. Only the top two tiers—60 and 72 months—allow annual payout, and only with a 5% reduction from the maturity rate.

Lock Term	Maturity Payout	Annual Payout	SRF Minimum Share
6 months	50%	N/A	50%
12 months	55%	N/A	45%
18 months	60%	N/A	40%
24 months	65%	N/A	35%
36 months	65%	N/A	35%
48 months	70%	N/A	30%
60 months	75%	70%	25%
72 months	85%	80%	15%

## 4. Payout Structure

### 4.1 Short- and Mid-Term Stakes (6–18 months)

- Payout occurs once at maturity.

### 4.2 Long-Term Stakes (24–72 months)

- Maturity Payout: Full percentage as shown in the table.
- Annual Payout (Only for 60m and 72m tiers): Reduced by 5% from maturity rate.

These rules ensure member flexibility without compromising SRF compounding strength.

## 5. Yield Caps & Constraints

- Maximum member share: **85%**
- Minimum SRF share: **15%**
- Changes permitted only when  $RMNSI \geq 3.0$  and never beyond these caps.

Founder veto applies to prevent destabilizing adjustments.

## 6. Founder Mining Contribution System

Founder mining is handled transparently under the following rules:

- **100% of Founder mining output enters the SRF.**
- The Founder may optionally stake up to **50%** of that mining output in the USDT staking program, under identical terms and restrictions as any member.

This ensures fairness while allowing the Founder to participate in the same yield system without special privileges. All Founder stakes are publicly visible.

## 7. Version & Control

Document: RMN Staking & Yield Policy

Version: v1.1

Changes: Clarified annual payout rules and Founder mining participation.

All changes require governance approval and must comply with RMN's safety and peg-stability principles.
